

tion with the Health Resources and Services Administration (HRSA), the National Institutes of Health, and the HIV Medical Association of the Infectious Diseases Society of America, has published the *Recommendations for Incorporating HIV Prevention into the Medical Care of Persons with HIV Infection*. These groups will work to disseminate this document to a variety of health care providers.

➔ **Further decrease perinatal HIV transmission.** CDC will promote recommendations and guidance for routine HIV testing of all pregnant women, and, as a safety net, for the routine screening of any infant whose mother was not screened. CDC will work with prevention partners, including the American College of Obstetricians and Gynecologists, the American Academy of Pediatrics, the American Academy of Family Physicians, and the American College of Nurse-Midwives, to disseminate the recommendations and support their implementation.

CDC will monitor the implementation of these new activities through several systems, including new performance indicators for state and local health departments and CBOs, monitoring HIV incidence, and expanding its surveillance system by implementing a national behavioral surveillance system.
